COATERS

TRIGOMAT MATT

Art. No. 162.912 10 L canister

Art. No. 162.911 5 L canister

- for all water resistant surface materials, also for sealed wood and parquet coverings
- incl. safe step and slide-reducing agents
- ideal for use in hospitals and old-age nursing homes
- resistant to surface disinfection - limited as to restancy of hand-disinfection agents
- offering surface restoration in combination with Solex system dry spray basic cleaner

APPLICATION RANGE:

For a highly hard wearing coater on all floor surface materials with sealed and also porous surfaces. For an optimum of surface protection of caoutchouc, pvc, and linoleum floor coverings and other hard surfaces - in hospitals and old age nursing homes. Do **not** apply on floor coverings based on PU.

INSTRUCTIONS FOR USE AND DOSAGE:

Trigomat Matt only for well basic cleaned surfaces! In case of strongly porous floor material - such as **linoleum**, it is recommended to use Polymer Primer or Bigomat Matt in 1:1 solution for the first layer. After the first coating - and after complete drying of the surface - use the single disk and suitable pad for an even balancing of the applied coater. Turn down or shut off heaters. Air rooms well. Apply between 1-3 thin coater levels using Trigomat Matt. Allow each layer to dry thoroughly (ca. 20-30 Minutes). Product consumption ca. 12.5-25 ml/m² and layer. After completion - allow 2 hours for settling prior to walking again. For normal stress allow 24 hours after completion. Trigomat Matt requires several days for maturity and gaining 100 % stability. Then go ahead with machine polishing! Trigomat may be used for **surface restauration** - by simply diluting it in 1:10 up to 1:1 and use this dilution for removing of coarse debris accumulated on the surface and for restoring! The solution is applied by mopping over floor in the Figure-8 Wiping Technology. For **spray buffing** dilute 1:1. For **surface restauration** and for **basic cleaning** we recommend Solex, Lin Plus, Power Strip, Agil or RZ-ST 10. For **daily cleaning** we recommend Blue Star, Premium N^o 4, Kleen Top or Prodomo Clear Wipe + Shine. Do **not** apply on floor coverings with producer-applied transparent PU protection layer!

If improperly applied - and for claims resulting from such improper handling - there will be no legal claims accepted.

Do not expose to frost!

TECHNICAL DATA:

Form: milky-white liquid
Odour: fresh
Viscosity: low
Density: 1020 g/L
pH-value in delivery state: 9

INGREDIENTS:

Below 5 %: anionic surfactants
Contains: preservatives: benzisothiazolinone, perfumes
Giscode: GE 10
Stability: at least one year in original containers; protect against frost

LABELLING: not applicable

According to EC-regulations or the corresponding national regulations the product does not have to be labelled.

TRANSPORT:

No dangerous good in sense of these transport regulations (ADR).
